

I created a 3D blob using blob mixer. The blob has my name on it as the title. The blob reflects me because of the colors used and because of the spikes and shape. The colour I used was yellow for the background, blue and red on the blob. The three colors represent my country's flag, where I am from. I especially like to implement these three colors when I am working on my designs. Red represents my strength, blue my passion and yellow my happy easy-going personality. By designing this blob, it also reflects me as a designer, what I make is designs for communication and that I am a Graphic designer.

### **3D BLOB:**
